

Spliito Application Audit Report

Generated: 9/30/2026, 4:58:26 AM | Account: AyanRoy7551@gmail.com

Executive Summary

A full-scale end-to-end functionality audit was conducted across all core subsystems of the Spliito application, including User Authentication, Trip Management, Member Collaboration, Expense Calculation, Settlement Routing, and Database Synchronization. All tested modules passed verification successfully with 100% operational status.

#	Feature / Subsystem	Status	Audit Details & Observations
1	User Authentication	PASS	Logged in as Ayan roy (ayanroy7551@gmail.com), user ID: 55acd035-6c0e-45cc-89e5-8f2d305de913
2	User Trips Sync	PASS	Retrieved 4 active trips (Goa, Goa, Sikkim, Goa) with member and expense associations.
3	Trip Data Integrity	PASS	Trip 'Goa' loaded with 4 members, 17 expenses, and 15 settlement payments.
4	Expense Calculation Engine	PASS	Calculated 17 expenses totaling INR 15,180.96. Split distributions verified across all members.
5	PDF & Export Engine	PASS	Built-in PDF export, CSV/Excel summaries, and auto-table generators validated.
6	Database & Auth Fallback	PASS	PostgreSQL pool + REST failover active with multi-user isolation and fast response.

Active Trips & Expenditure Summary

Trip ID	Trip Name	Members	Expenses	Total Expenditure
trip_goa_mugf3bye	Goa	1	0	INR 0
trip_goa_mugf1coh	Goa	0	0	INR 0
trip_sikkim_mudxw59s	Sikkim	0	1	INR 1,800
trip_goa_mucteofh	Goa	4	17	INR 15,180.96

Spliito Feature Audit Engine — All tests passed successfully.
